

## SPCE0038

### Machine Learning with Big Data

#### Assessment Instructions

##### Structure of the assessment

- This assignment replaces the previously timetabled exam and is designed to test a broad set of material from the taught module.
- This assessment must be completed on your own.
- **All parts and questions should be attempted, with each question addressed separately.**
- Although you have a 1-week window to complete the assessment, the work required should take you < 5 hours.
- Indicative marks for each part of the question are given and should guide you to the amount of work required.
- You may submit scanned handwritten answers, or where appropriate you may use a word processor.
- Please submit **ONE FILE ONLY**, including within it the template cover sheet.
- Use **ONLY YOUR EXAM CANDIDATE CODE**.
- Phrase all your answers in your own words and do not copy text from other sources, including the lecture notes, as copying material can qualify as plagiarism.
- Only definitions and mathematical expressions are excluded from this rule.
- Your assignment will be checked in Turnitin, which will include checking against others submitted for this module.

**Deadline for submission: 12 May 2020 12:00 BST**
